

A 5x3 grid with yellow cells. The top row is labeled '3' on the left and '5' on the right. The second row is labeled '5' on the left. A grey dot is in the bottom-right cell.

A vertical number line with labels 5, 7, and 9. The line is divided into four equal intervals by horizontal grid lines. There are three data points: a grey dot at the first interval above 5, a white circle at the second interval above 5, and a white circle at the third interval above 5.

A 10x10 grid with columns labeled 1-4 and rows labeled 5-7. A black bar is at row 5, columns 1-4. A grey dot is at row 7, column 2.
